TDS devices are useful to detect the temperature of hazard part or live part of medium and high voltage apparatus due to contact-less technology.

The very small and reliable sensor can be easily mounted near target zone and is remoted to control unit by electrical shielded cable.

The control unit is locally operated and can manage up to 6 independent channels-sensors in order to cover a wide area of cubicle.

The local indication allow operator to have a clear and fast understanding of thermal situation inside cubicle.

Each alarm is indicated by red led and a selectable led display could be scrolled to show in real time the temperature detected by each sensor.

A customization of alarm and lock temperature is available on front of device by selecting the dip-switch.

Digital transmission by Modbus RTU or Profibus DP-V0 is available if a net is required.

Standard changeover contacts are also available for remoting over-temperature dangerous signalling.

A realtime diagnostic supervises both the device and sensors and allow to get a safe system: if a failure is occurring a specific changeover contact is operated.

TDS/x/x

Technical features

Rated input voltage :24÷220 VDC
Power consumption: 2W max
Input : 1-6 Thermopile sensors
Output:1x changeover contact for alarm1x changeover contact for lock1x changeover contact for failure
Digital output: ...	Modbus RTU RS485, Profibus DPV0
Local indication:	PWR aux power on 1-6 CHX led with multicolour indication Green: temperature OK Yellow: temperature ALARM Red: temperature LOCK
Temperature Thresholds:.....	selectable by dip.switch
Electrical connection:	electrical shielded bus cable
Max distance link:.....	10m
Temperature range : -30°C ÷ 70°C
IP degree protection :.....	control unit IP54 sensor IP65
Mounting arrangement:.....	DIN RAIL

Sensor Features

Technology:...	microcontrolled contactless pyrometer
Output:.....	amplified and compensated signal
Temperature reading:	-30°C – 250°C Factory temperature compensation
Accuracy.....	+/- 5°C typical @ mid range
Spot to ratio:	8:1
Type of measurement:	area integration on spot
Response time:.....	0.2s
Max link distance:	10m
Surface of object:.....	dark and matt*
* other reflective surfaces could reduce accuracy	

Relay features

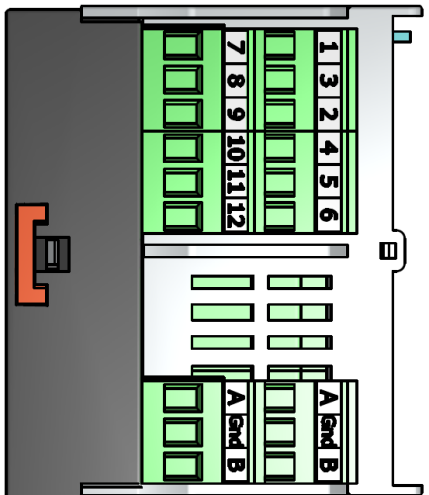

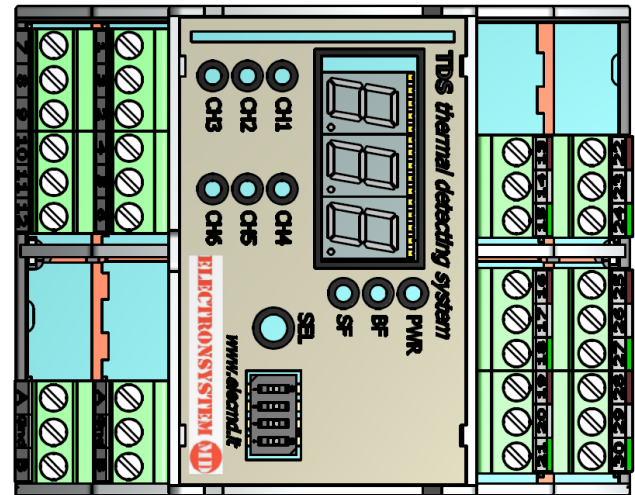

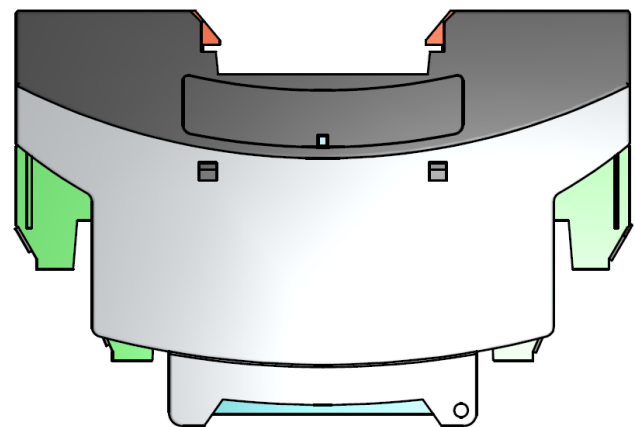

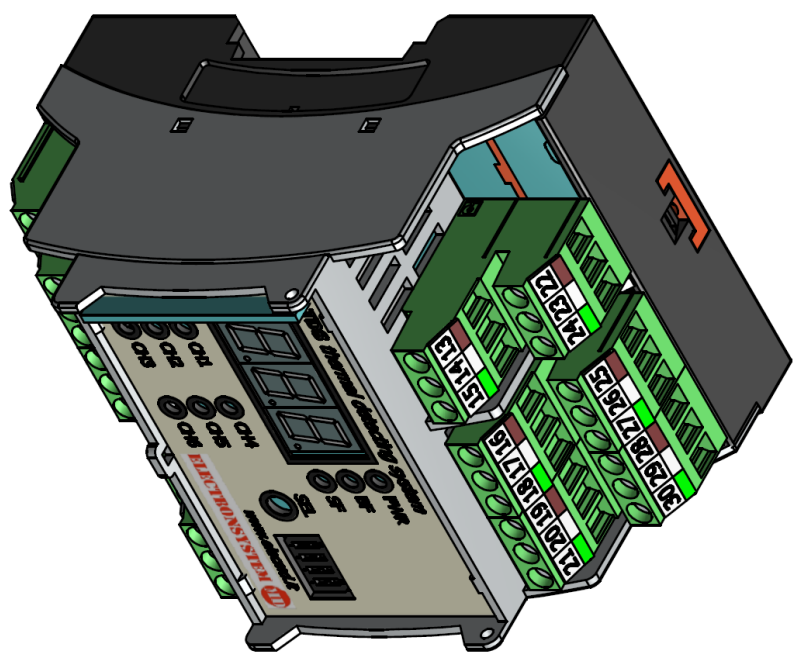

Contact material :Ag+Au clad
Rated current /Max peak current:	1A
Rated voltage/Max switching voltage:.....	30/110 Vdc
Breaking capacity DC1 30/110:.....	1/ 0.3 A
Minimum switching load:.....	10microA 10mVDC
Mechanical life:.....	5*10 ⁷ cycles
Electrical life @ 1A 30Vdc:.....	2X*10 ⁵ cycles
Insulation between coil and contacts:.....	1,8kVrms
Dielectric strength between open contacts:..	0,75kVrms

Directives and standards applicable

EMC directive : 2004/108/EC
RoHS directive : 2002/95/EC
Low voltage directive:	2006/95/EC
EN 55011:	(ISM) radio-frequency equipment
EN 61000-4-2:	Imm. to electrostatic discharge (ESD)
EN 61000-4-3: ...	Imm. to radiated RF electromagnetic fields
EN 61000-4-4:.....	Imm. to electrical fast transients - Burst
EN 61000-4-5:	Immunity to Surge
EN 61000-4-6:	Imm. to induced by RF fields
EN 61000-4-11: .	Imm. to voltage dips and short interruptions
EN 61000-6-2:2005:	(EMC) - Industrial emission
EN 61000-6-3:2007:	(EMC) - Residential emission
EN 61000-3-3:2002:	(EMC) - Flicker
